

Objective

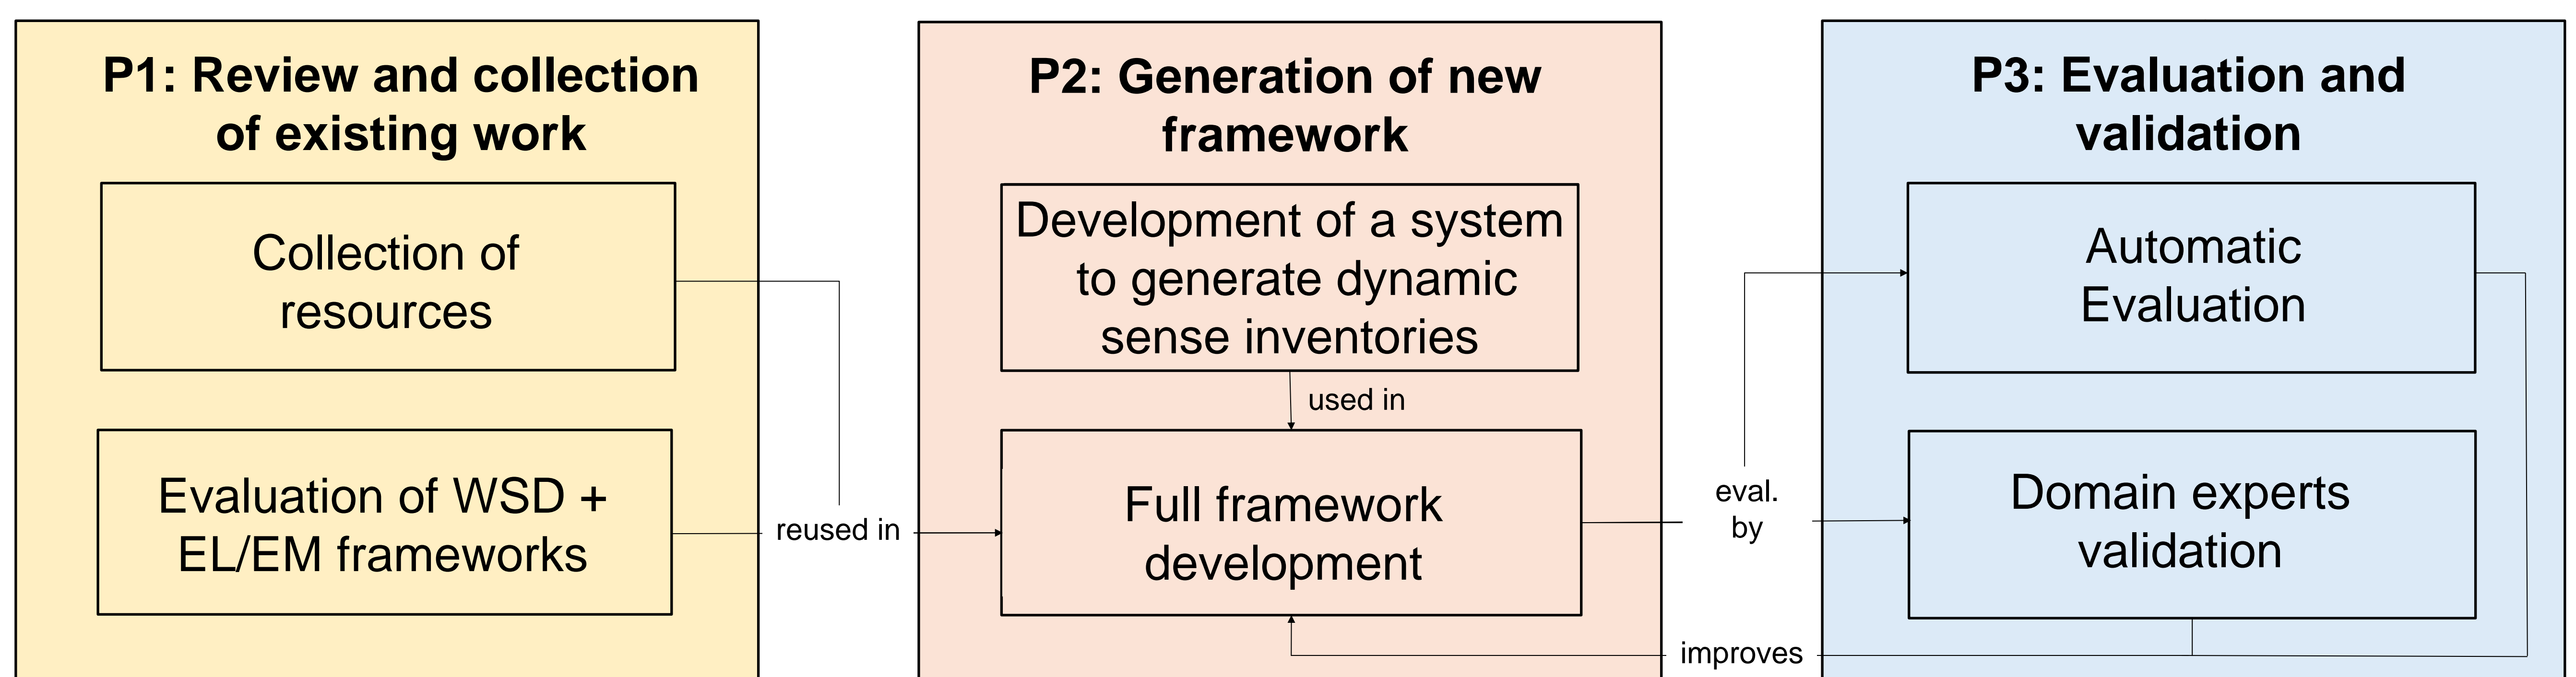

Hypothesis and research methodology

Research Problem

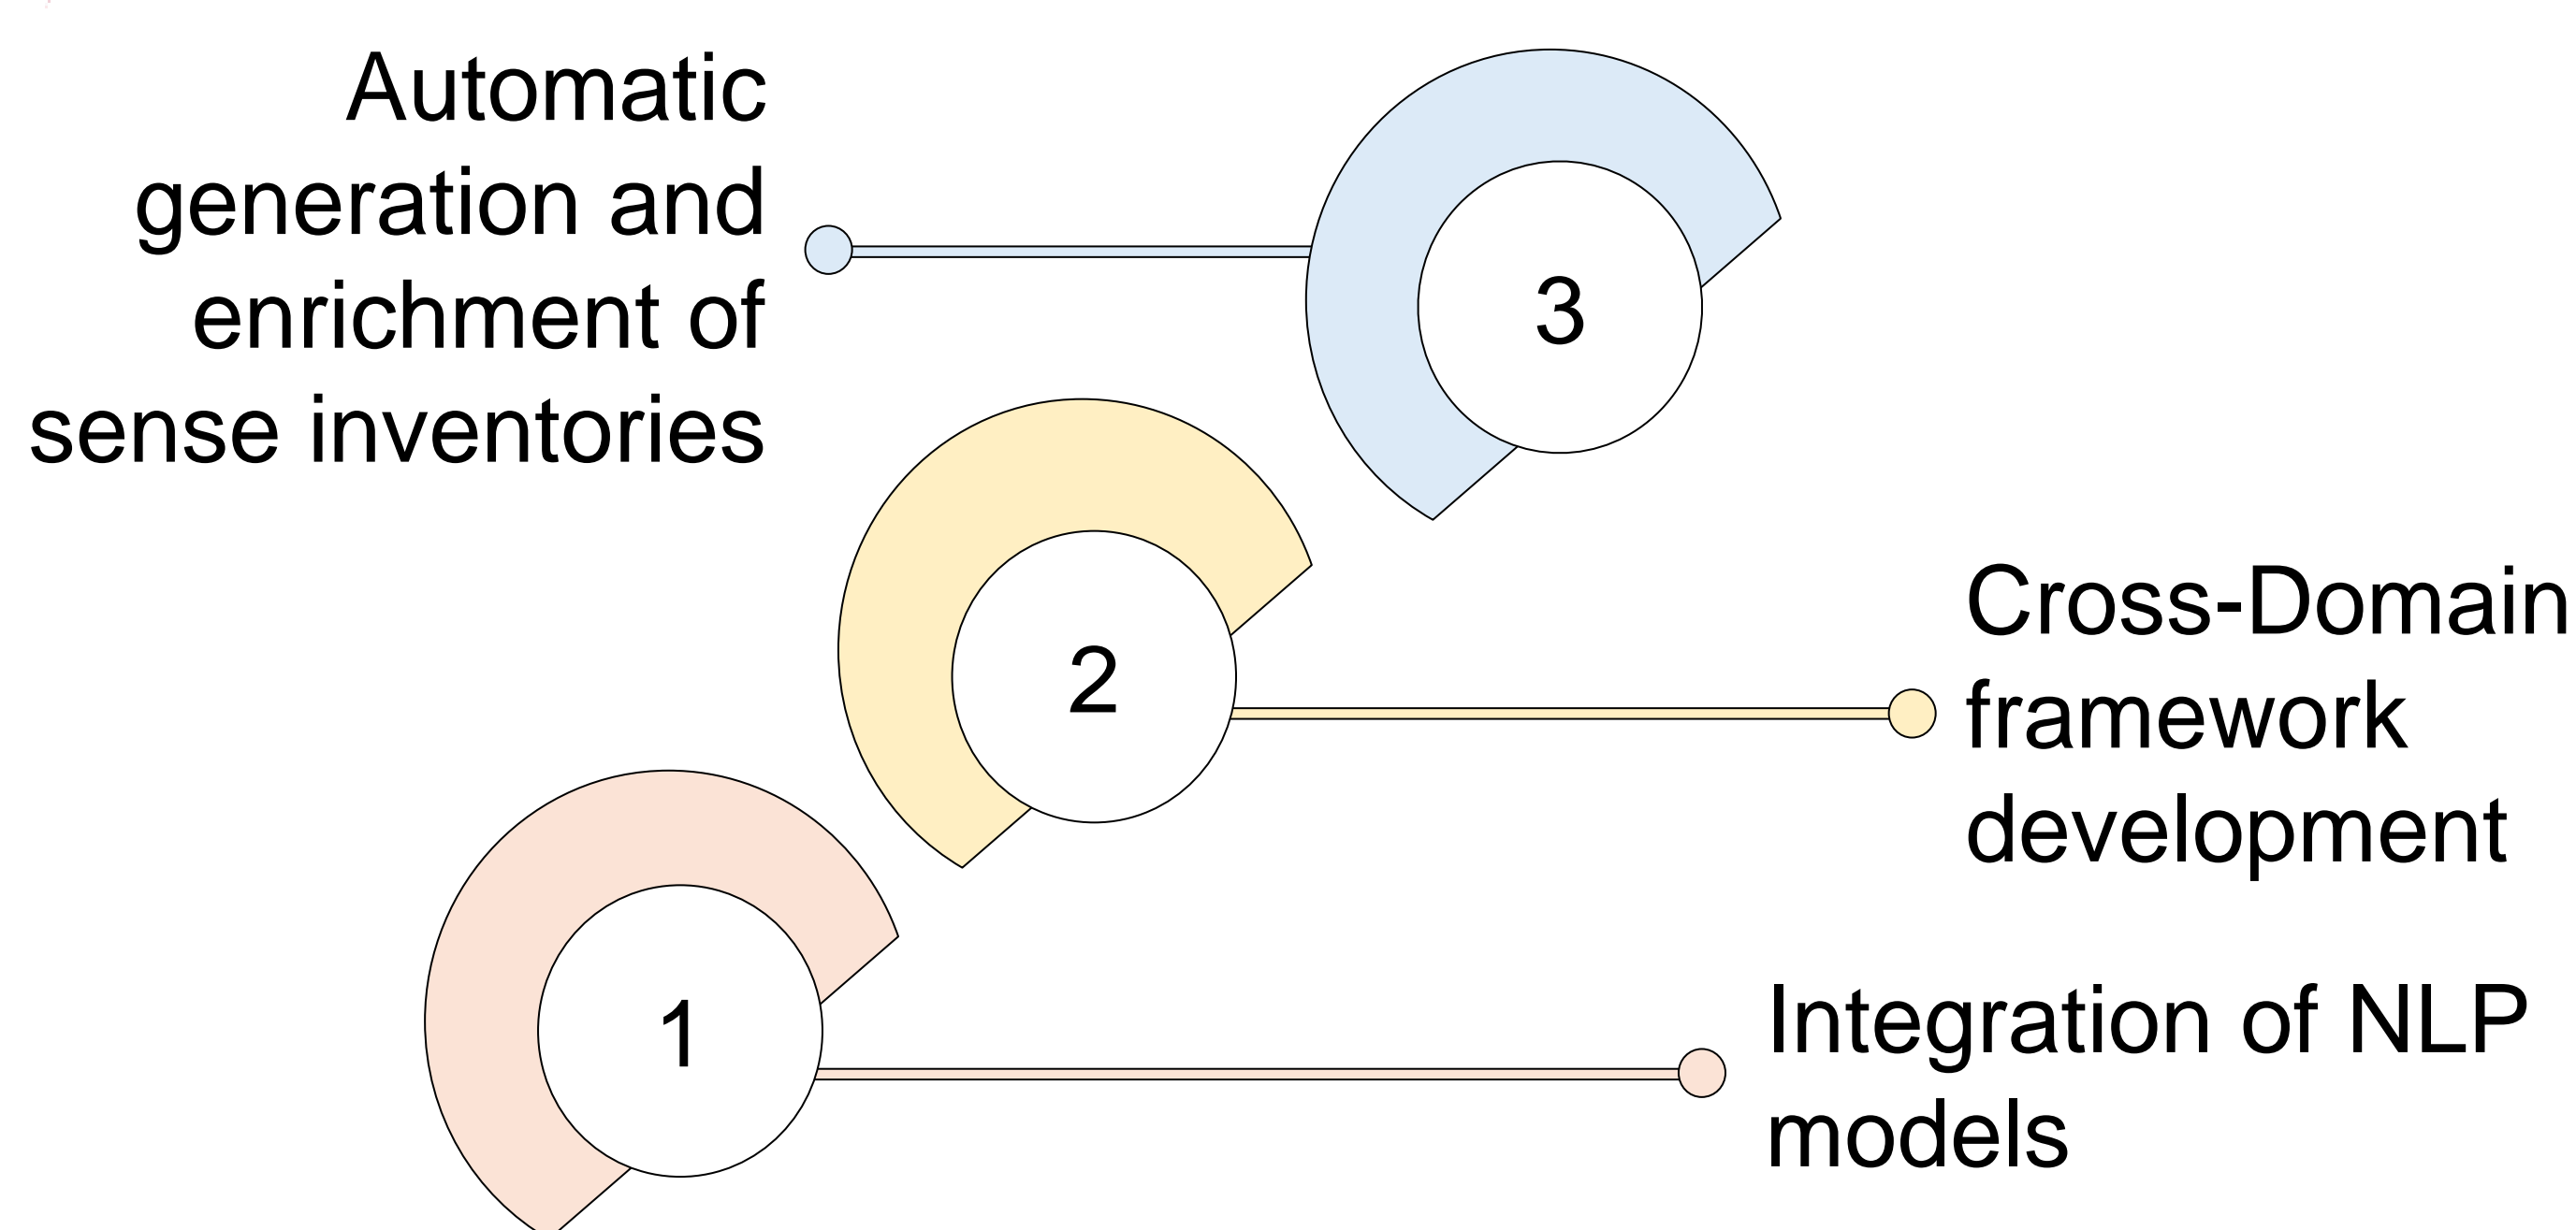

Generating linguistic resources in Linked Data format to leverage the Semantic Web is a very complex and expensive task in terms of time and human effort.

Hypothesis

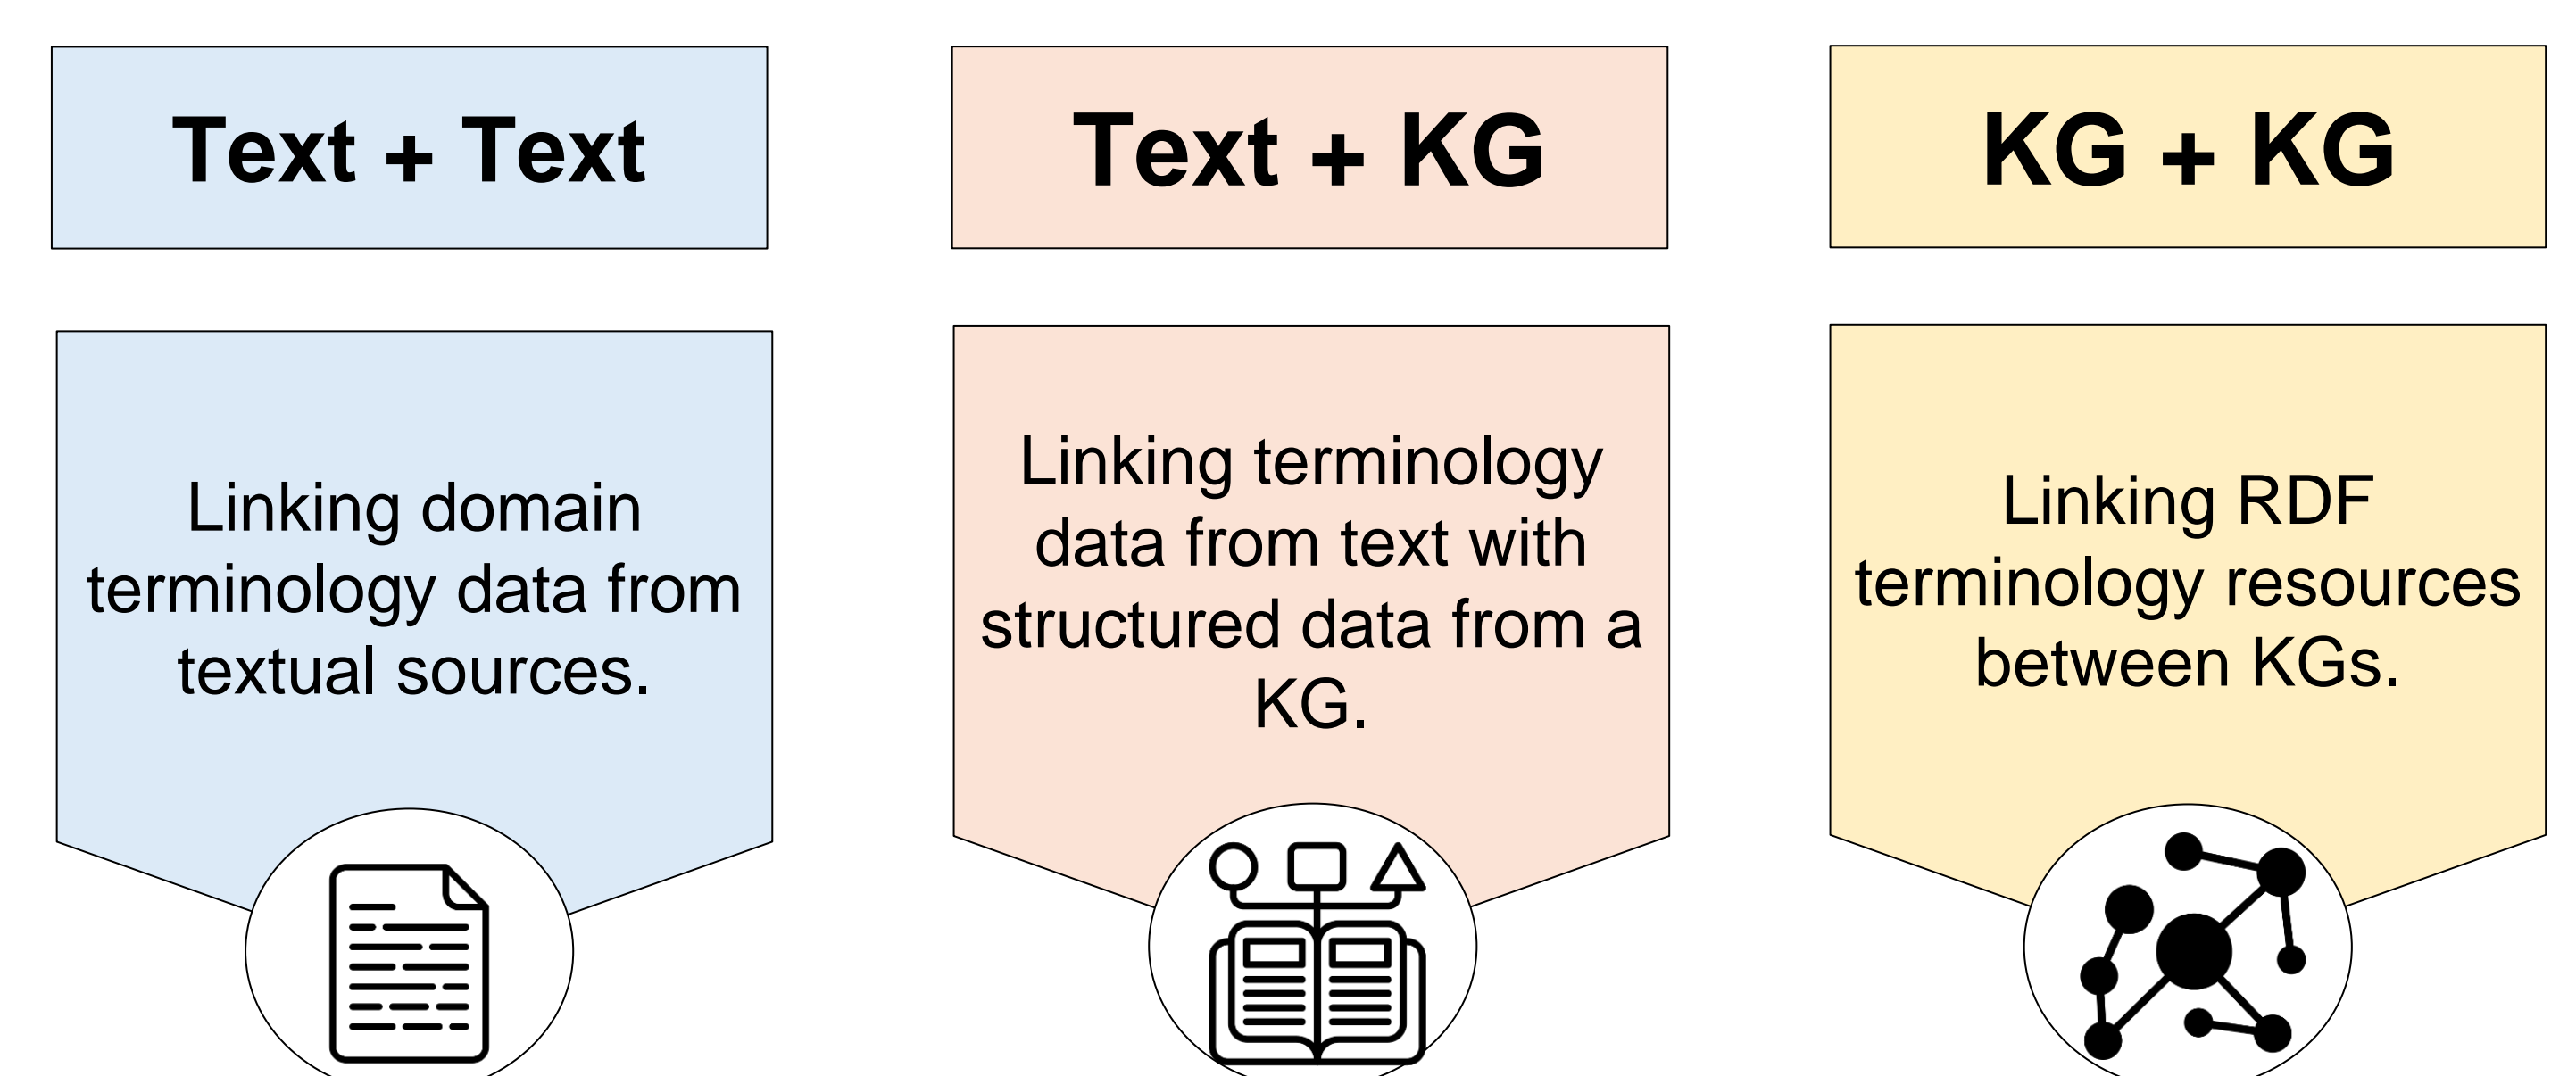

Adaptive and dynamic sense inventories could facilitate the development of a WSD and Entity Linking/Entity Matching system capable of semantically connecting specialized terminologies in line with Linked Data principles.

Future work

Use cases

Funding

This work has been funded by **INESData** (Infraestructura para la INvestigación de ESpacios de DATos distribuidos en UPM) project, from Ministerio para la Transformación Digital y de la Función Pública (PRTR, UNICO I+D CLOUD, EU NextGeneration).

Financiado por
la Unión Europea
NextGenerationEU

GOBIERNO DE ESPAÑA
MINISTERIO DE TRANSFORMACIÓN DIGITAL Y FUNCIÓN PÚBLICA

UNIVERSIDAD POLITÉCNICA DE MADRID
